

Show your true colors. Show after show.

Banners you print today for your Chicago event should match the ones you printed for last month's Las Vegas event. Color matching across all your items creates a powerful, consistent impression. From large-format banners and floor graphics to brochures and tent cards, FedEx Office knows how to get color right the first time.

Throughout our integrated network, thousands of standardized printers are calibrated to the same standards daily and our 20 large-format Signs & Graphics production centers are Certified G7 Master Printers — the industry's premier designation for color management. That means spot-on color for dynamic brand and event communications, whether you print at one or several of our locations.

Let us help you create a show-stopping look with beautifully matched color.

How FedEx Office makes your event shine:

Consistent color.

Entire network is calibrated to the same high standards.

Precision accuracy.

Exacting procedures and tools for flawless color reproduction.

Color matching.

PANTONE® Matching System means outstanding consistency.

G7 Master Certification.

The industry's premier designation for color management.

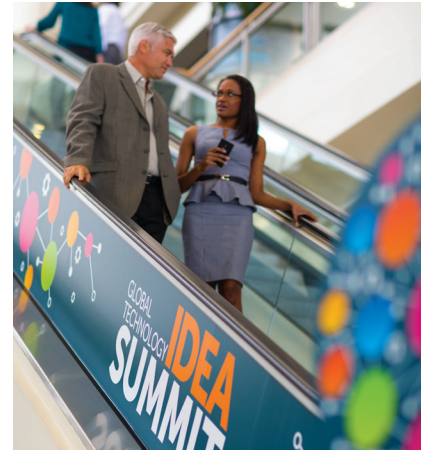

Sustainability.

FSC Chain of Custody certification from the Forest Stewardship Council.

Create a look that steals the show.

Get the advantages of FedEx Office color matching.

Consistency. To deliver consistent color output day to day and location to location, our professional-quality printing and color matching program is designed especially for the Agfa Jeti 3020 Titan/Jeti Titan HS UV/Agfa Anapurna superwide printers in our 20 Signs & Graphics production centers. Our carefully managed method helps ensure that every order has the correct colors, and that those colors look the same in each printing.

Accuracy. When it comes to color matching, precision is everything. Our strict procedures and precise tools help enable us to maintain accuracy throughout every step of the printing process, ensuring beautiful reproductions of individual colors so your printed event materials look the way you want them to.

PANTONE® Library. The PANTONE® Library is a color specification catalog designed for specialty inks on offset printing presses. At FedEx Office, we make every effort to achieve colorimetric or visual matches to the PANTONE MATCHING SYSTEM®. Extensive testing has been done to optimize the PANTONE® Library to provide the highest accuracy and consistency across all our Signs & Graphics production centers.

Want to Learn More?

With more than 120 onsite FedEx Office locations in top hotels and convention centers, we're ready to help you from the start.

Our event solutions consultants know the venues and can help, from pre-event planning to final printing. From gigantic wall and floor graphics to escalator and column wraps, we've got you — and your event space — covered.
