

Are you ready for DSCSA?

The U.S. Food and Drug Administration's (FDA) Drug Quality and Security Act (DQSA) was signed into law by President Obama on November 27, 2013. Title II of DQSA, the Drug Supply Chain Security Act (DSCSA), outlines critical steps to build an electronic, interoperable system to identify and trace certain prescription drugs as they are distributed in the United States. What does this mean for you?

Key DSCSA implementation dates

2015	Manufacturers, wholesalers and repackagers required to provide and/or receive pedigree for each transaction
2017	Manufacturers required to include a product identifier number on each product
2019	Wholesalers required to accept or distribute only prescription drug products that include a product identifier
2020	Dispensers required to accept or distribute only prescription drug products that include a product identifier
2023	Mandate for full implementation of interoperable electronic system

Seamless resource to help comply with DSCSA

FedEx TranSmart® is a secure, password-protected, third-party validated online system that helps you to comply with DSCSA without capital investment. The solution allows you to view Proof of Delivery (POD) signatures for your FedEx Express® and FedEx Ground® packages for up to seven years after ship date and provides a true link between each POD and your Product Tracing Information (PTI) form. Here's how FedEx TranSmart works:
