Looking for more control, simpler freight management and elevated cost optimization? Look no further than certified third party software by FedEx Compatible.

Here's how your business will benefit:

Automation

Automating your freight shipping with a FedEx Compatible software solution provides immediate benefits. You'll realize that streamlined processes reduce human error, provide accurate rates for shipments, and speed up your docks with automated Bills of Lading and driver scan-and-go.

Cost Control

You're in the driver's seat when it comes to controlling costs once you've chosen your FedEx Compatible solution. With 2-click shipping, pre-set defaults and multi-location shipping management, freight automation is your solution to maintaining increased cost control.

Powerful, Seamless Integration

With FedEx Compatible, streamlining your shipping process is automatic, so you'll be able to take advantage of automated Bills of Lading, scheduling, notifications, multi-shipment processing and custom rate quotes, plus address book integration to maximize the value of your solution.

FedEx Compatible has all the solutions you need to choose a single third-party system with FedEx shipping functionality integrated directly into it. Eliminate inefficiencies and choose the solution that's right for you and your business.
